

## Slide Hot Air Dryer

AUSTRALIAN MADE

FRONT

REAR

### FEATURES

A general purpose hot air dryer with a continuous fan assisted heated air supply. Ideal for evaporating small quantities of water from the surface of slides (plastic and glass). This model can also be useful for warming of products, instruments or drying other laboratory equipment.

- Operating temperature is approximately 50°C to 60°C (based on an ambient of 24°C)
- Finished internally in stainless steel with a stainless steel perforated hinged lid.
- External finish is powder coated steel.
- Temperature indication is by a removable dial thermometer.
